

INSTALLATION INSTRUCTIONS AND SAFETY PRECAUTIONS

FOR YOUR SAFETY, READ INSTRUCTIONS COMPLETELY AND CAREFULLY.

WARNING - POTENTIAL PERSONAL INJURY

IF YOU ARE NOT FAMILIAR WITH DISHWASHER INSTALLATION, SEEK A QUALIFIED SERVICE PROFESSIONAL.

CONTENTS:

- Mounting Brackets (2)
- Mounting Screws (2)

To Install Mounting Brackets, follow instructions carefully.

IMPORTANT: These instructions do not replace the installation instructions supplied by the manufacturer of the dishwasher.

1. Prep the surface for proper adhesion. Completely clean the mounting surface with an alcohol-based solution. Read cleaning solution for proper time to allow area to completely dry.
2. Open the dishwasher door to access the mounting bracket tabs attached to your dishwasher. If your dishwasher does not have mounting tabs, contact us and we can find the correct mounting tabs for your model.
3. Install brackets, with the included set screw, to each one of the dishwasher's mounting brackets.
4. Peel back a corner of the protective backing from the back of the mounting brackets, so that it's easier to remove completely after installation. Just get it started, but do not remove completely.
5. Position dishwasher underneath countertop to the desired depth and make any necessary adjustments.
6. Once in place, completely remove the protective backing from the back of the brackets.
7. **Firmly press for 30 seconds** to affix the brackets to the mounting area of the countertop. Have your clamps ready.
8. **Use a clamp to hold in place for five minutes.** Once set, the bond will cure **within an hour.**

Easy to Install | Fits MOST Dishwashers

Approved for Acrylic, Granite, Quartz, and other solid surfaces.

CAUTION:

To the installation professional, please read and follow instructions carefully before using dishwasher. Failure to follow these instructions completely could result in improper installation leading to adhesion failure causing the dishwasher to fall forward unexpectedly.
